

STEALTH²

HD

WOMEN'S DRIVER

FEATURE	BENEFIT
NEW 60X CARBON TWIST FACE	Building on the speed producing success of the original 60X Carbon Twist Face that optimized energy transfer for fast ball speeds, the new face design in Stealth 2 features an advanced version of Inverted Cone Technology (ICT) to help maintain ball speed on off-center strikes and increase forgiveness. It weighs 24g (2g lighter than the original Stealth face) and is designed to have an expanded COR area for a larger sweet spot and boosted performance across the entire face.
CARBON REINFORCED COMPOSITE RING	The Carbon Reinforced Composite Ring unites the driver head into a singular force and frees up additional mass that has been strategically placed to create a massive leap in forgiveness.
HIGH DRAW DESIGN WITH FORGIVENESS	Standard draw bias designs promote a corrective flight at the expense of forgiveness, utilizing the weight savings from the full-body carbon construction and shifting the Inertia Generator closer to the heel, we're able to maintain draw-bias while creating the highest MOI in the Stealth 2 family of drivers.
LIGHTWEIGHT HEAD CONSTRUCTION	Featuring lighter head weight than the standard model, Stealth 2 HD Women's driver is designed to enhance clubhead speed.
NANOTEXTURE COVER	The 60X Carbon Twist Face is encased by a polyurethane cover, featuring a revolutionary new nanotexture technology. The nanotexture cover is used to fine tune launch and spin to optimize total distance regardless of playing conditions.
ASYMMETRIC INERTIA GENERATOR	The Inertia Generator remains the foundational source of refined aerodynamic properties. The result is a slippery-fast head shape that aids in swing speed generation on the downswing for golfers at every level. It is outfitted with a massive rear weight to optimize MOI and forgiveness.
THRU-SLOT SPEED POCKET	Our flexible Speed Pocket™ design is engineered to maximize ball speeds and produce additional forgiveness on low-face strikes.

LAUNCH AND SPIN	FLIGHT BIAS
High Launch / Mid Spin	Draw
